

## Window Conversion Angles

### Creating an ideal surface for fitting Trackglaze Vertical / Horizontal, and other Easyfix Secondary Glazing systems

Window Conversion Angles are 25mm x 25mm, 90 degree angles which are 3mm thick, making them extremely strong. They can be screwed to wooden window frames to make either a 4 sided cavity, or a flat wide surface, for secondary Glazing systems that need either in which to be installed. The Angles are made in high quality Outdoor Grade uPVC, in either white or brown, providing an exact match for the various Easyfix glazing and draught excluder products. They can be mitred with 45 degree cuts if required for cosmetic purposes.

Angles are common products available from many retail outlets. The Window Conversion Angles are particularly strong because of their thickness, and this ability to support substantial weight, with the colour matching, makes them the most suitable companion for other Easyfix products.

#### CONVERTING FROM FLAT WINDOW SURROUND TO A CAVITY

These Angles can be fitted so that the fixed leg (and screws) remain visible or covered once the Trackglaze system is installed. These images show the cavity created, and how the Angles are fixed in place:

Frame unsuitable for cavity install

Angles fitted, legs/screws on show

Angles with internal legs/screws

**Easyfix Secondary Glazing systems suited to this method are Trackglaze Vertical and Trackglaze Horizontal.**

#### CONVERTING FROM CAVITY TO A FLAT FITTING SURFACE

Where the window surround is too narrow to fit your secondary glazing system of choice, the Angles can be attached within a cavity or on the inner edge of a window frame to provide a wider fitting surface. These images show the results, with the choice of fitting direction:

Frame unsuitable for face fitting

Angles fitted, screws hidden

Angles with screws visible

**Easyfix systems suited to this method are Magnetglaze, Magnetglaze Extreme, Magnetglaze Pro and Magnetglaze Pro Extreme**

**Pack Contents:** The Window Conversion Angles come in packs of 3 x 3m lengths in white or brown. If a large number of windows are being converted with the Angles, bulk packs of 10 x 3m lengths are also available.
